

AUTOFARM ONTRAC AUTOSTEER

SIMPLE AND RELIABLE HANDS-FREE GPS ASSISTED STEERING

With the new OnTrac from AutoFarm, you will perform spraying, spreading, tillage, planting, or harvesting with greater accuracy and cover more ground confidently and safely.

In about 30 minutes and with basic tools, you can upgrade the ATC visual guidance system to the new OnTrac hands-free steering system.

FEATURES AND BENEFITS

Cost Effective

Field experience shows a 25% reduction in inputs and an equal increase in productivity is achievable. Take all of your inputs, fuel, labor, and capital, add them up, and calculate the possible savings of 25%. In many cases these savings will allow the system to pay for itself in the first year!

Simple Installations

The OnTrac mounts below the steering wheel making the system easy to engage. This unique design, unlike small friction wheel systems, gives positive steering control and unobstructed access to the steering wheel.

Universal Design

OnTrac is designed to be installed on almost any tractor, sprayer, combine or other approved off-road vehicles.

Accuracy

The OnTrac can provide 2-4 inch pass-to-pass accuracy using Omnistar HP corrections or 6-12 inch pass-to-pass accuracy using WAAS DGPS corrections.

Reliable

The rugged design of the OnTrac will provide years of dependable service and safe operation.
